

DISCLAIMER & RISK DISCLOSURE - TRUE TRADING

Last updated: December 22, 2025

TRUE Trading (“TRUE”, “we”, “our”, or the “Protocol”) is a decentralized software protocol providing non-custodial tools for interacting with smart-contract-based perpetual futures and related derivative products deployed on public blockchain networks. Access to or use of TRUE constitutes acceptance of this Disclaimer & Risk Disclosure.

1. No Broker, Exchange, or Bank Relationship

TRUE is not a registered broker-dealer, Futures Commission Merchant (FCM), Designated Contract Market (DCM), Swap Execution Facility (SEF), Alternative Trading System (ATS), investment firm, exchange, or any other licensed securities or derivatives intermediary.

TRUE is not a bank, credit institution, or deposit-taking entity. Digital assets interacted with via the Protocol are not covered by FDIC, SIPC, or any governmental or private insurance scheme and may lose value in whole or in part.

2. No Offer or Solicitation

Nothing on this website, within the Protocol, or in any related documentation constitutes, or should be construed as, an offer, solicitation, invitation, or recommendation to engage in any regulated activity, including the trading of derivatives, securities, or digital assets, in any jurisdiction.

Access to the Protocol is provided on an “as-is”, self-directed basis and does not constitute the provision of investment services, financial promotion, or marketing of regulated products.

3. Jurisdictional Restrictions & Reverse Solicitation

The Protocol is not offered to, and may not be accessed or used by, residents, citizens, or entities located in the following jurisdictions: the United States of America, Canada, the United Kingdom, United Arab Emirates (UAE), the European Economic Area (EEA), Mainland China,

Hong Kong SAR, Singapore, or any jurisdiction where access to or use of the Protocol would be prohibited by applicable law, regulatory requirements, or subject to international sanctions.

For the avoidance of doubt, any access to the Protocol by users located in restricted jurisdictions, if technically possible, shall be deemed to occur solely at the user's own initiative and shall not constitute an offer, solicitation, marketing, or provision of services by TRUE in such jurisdictions.

Availability of the website, interface, or Protocol in any jurisdiction shall not be interpreted as an offer, solicitation, or promotion of services in that jurisdiction.

The use of VPNs, proxy servers, or any other technical means to circumvent geographic or jurisdictional restrictions is strictly prohibited. TRUE reserves the right to restrict, suspend, or terminate access where circumvention is detected.

Users are solely responsible for ensuring that their access to and use of the Protocol complies with all applicable laws and regulations in their jurisdiction.

4. User Representations

By accessing or interacting with TRUE, you represent and warrant that:

- (a) you are legally permitted to use the Protocol under the laws applicable to you;
- (b) you are not a "U.S. Person" as defined under CFTC Rule 4.7;
- (c) you are not a resident, citizen, or tax resident of the United Arab Emirates (UAE);
- (d) you are not subject to sanctions or located in a restricted jurisdiction;
- (e) you understand and accept all applicable regulatory, tax, and legal obligations.

TRUE does not monitor, verify, or determine the regulatory status of users and relies exclusively on user representations.

5. Smart-Contract, Oracle, and Market Risk

Use of the Protocol is entirely at your own risk. Smart contracts may contain bugs, vulnerabilities, logic errors, or exploits that could result in partial or total loss of funds. Perpetual futures trading is highly speculative and involves substantial risk, including liquidation and loss of 100% of posted collateral.

TRUE does not guarantee liquidity, order execution, price accuracy, oracle integrity, funding-rate calculations, or the solvency of any counterparty vault.

6. Non-Custodial Architecture & Third-Party Services

TRUE does not custody digital assets or fiat currency. Users retain control of assets via self-custodied wallets or smart-contract vaults.

Any fiat off-ramps, stablecoin conversions, debit cards, or payment services are provided exclusively by independent third-party service providers. TRUE does not control, operate, or assume responsibility for such services, their compliance, custody, or availability.

7. No Investment, Legal, or Tax Advice

All information made available through the Protocol, including analytics, PnL data, pricing, simulations, or risk metrics, is provided for informational purposes only and does not constitute investment, legal, tax, or accounting advice.

Users must conduct their own independent research and consult qualified advisors before engaging in any activity involving digital assets.

8. Conflicts of Interest

Participants in the TRUE ecosystem, including liquidity providers, vault operators, oracle publishers, and copy-trading leaders, may receive fees, rewards, liquidation incentives, or profit-based compensation.

Such incentives may create conflicts of interest. All interactions occur via autonomous smart contracts without discretionary intervention by TRUE.

9. Protocol Autonomy & Contributor Disclaimer

The Protocol operates autonomously through smart contracts deployed on public blockchains. Developers, contributors, interface providers, and affiliated entities do not operate, control, manage, or custody the Protocol or user assets.

No contributor or developer acts as an operator, intermediary, or fiduciary.

10. Taxes

You are solely responsible for determining and complying with any tax obligations arising from your use of the Protocol, including reporting, withholding, and remittance to relevant authorities.

11. Limitation of Liability

To the maximum extent permitted by applicable law, TRUE and its contributors disclaim all liability for any direct or indirect losses, damages, or claims arising from or related to use of the Protocol.

Nothing in this Disclaimer excludes liability where such exclusion is prohibited by law.

12. Acceptance & Updates

By accessing or using TRUE, you acknowledge that you have read, understood, and agreed to this Disclaimer and Risk Disclosure. This notice may be updated periodically. Continued use constitutes acceptance of the most recent version.
